

## **Erasmus+ Program at the Department of Mathematics A.U.Th.**

### **A) List of courses available to incoming Erasmus+ students**

The list of courses at the Department of Mathematics is dynamic and although the core courses are the same each year, several courses are added or removed.

The final list is decided (with 95% accuracy as last minute changes always happen) during the summer before each academic year.

To check the courses offered this year, visit the following link

[https://qa.auth.gr/en/search/course/acad\\_year~2020/faculty\\_id~5/period~1/POS~4000118/school-level~11-1/erasmus~1](https://qa.auth.gr/en/search/course/acad_year~2020/faculty_id~5/period~1/POS~4000118/school-level~11-1/erasmus~1)

for courses in the Winter Semester (beginning of October- end of January), and the link

[https://qa.auth.gr/en/search/course/acad\\_year~2020/faculty\\_id~5/period~2/POS~4000118/school-level~11-1/erasmus~1](https://qa.auth.gr/en/search/course/acad_year~2020/faculty_id~5/period~2/POS~4000118/school-level~11-1/erasmus~1)

for the Spring Semester (middle of February – middle of June).

You can use the generic search engine <https://qa.auth.gr/en/search/course>

to find any course at A.U.Th. For courses in the Department of Mathematics, choose successively: Faculty (Sciences), School (Mathematics), your level of study (make sure it is included in the agreement of your Department with A.U.Th.), the academic year (current or past) and the period of your visit: Winter or Spring.

Don't forget to check the box "For Erasmus Students" to make sure that you see the courses offered to incoming Erasmus students.

It is always better to check this list just before you fill in your Learning Agreement so that you get the latest update. To see the details (contents, instructor, method of examination) of each course, just click on the corresponding link at the list above.

### **B) Language of Instruction**

Note that in the Department of Mathematics there are no classes taught in English (except the English Language course). What we usually do is to provide reading material in English and/or set up meetings with the students for question/guidance through the material. Exercises, homework and etc are also provided depending on the class. It is recommended that you inform the corresponding instructor about your intention to take the class (provided this does appear in the list above) with an email.

As said before, last minute changes in the list of courses offered are possible, contact the Erasmus+ Coordinator at the Department of Mathematics, P. Batakidis at [batakidis@math.auth.gr](mailto:batakidis@math.auth.gr), if some course you had seen in the list is missing at a later stage.
